New Products

Premier Blonde Series

Shun Premier gets a bright and beautiful contemporary look in our new Premier Blonde series. The series features a full range of the most important pieces of kitchen cutlery, as well as a set of steak knives and our elegant starter set with Slimline Block.

Premier Master Utility 6.5"

Shun's Master Utility Knife combines the easy-to-use agility of a utility knife with the versatility of a chef's knife. We're proud to add this multifunction blade to the Shun Premier series.

Kai Kitchen Shears with Bone Notch

These attractive kitchen shears now come with a convenient bone notch. The new notch makes snipping through small bones easy and comes in handy for trimming flower stems, too.

Premier Blonde 5 Pc Starter Set

Premier Blonde 4 Pc Steak Set

Limited Edition Personal Steak Knives

Glide through your perfectly cooked steak with an exquisitely sharp Personal Steak Knife. These Limited Edition knives come in three handsome new handle designs and fold so they're easy to carry with you.

See page 52/91 for more information.

Blade Shapes

A blade shape for every purpose, every cooking style, every type of food

Having a variety of knives means you can always choose the knife that suits the dish you're preparing as well as your cooking style. The right knife makes every kitchen task faster and easier. It ensures each ingredient has the right texture for the recipe. Its sharp edge cuts cleanly, without bruising or tearing the food.

In other words, the right knife makes your cooking even better. That's why Shun provides a wide array of beautiful, high-performance knives to fill your block—so you'll always have the knife that makes each dish easier to prepare, more satisfying to cook, and deliciously successful.

Which knife is right for you?
There's no wrong answer

Your choices depend on your individual needs. Moving to a more plant-based diet? Add nakiri knives, in a range of sizes. The straight edge makes precise contact with the cutting board, so slicing and dicing vegetables is simple. Are you a bread baker? You'll love a Shun bread knife. Prefer a smaller knife? Try a 6-inch chef's knife. While there are common blade shapes found in most kitchens, your choice depends on the needs of your own kitchen creativity.

Chef's knife
Uses: slice, dice, mince.
6", 8", and 10" blade lengths available.

Utility knife
Uses: slice, peel, small items.
Serrated or non-serrated.

Paring knife
Uses: peeling, paring, small items.
3.5" and 4" blade lengths available.

Steak knife
Uses: steak, small items.
Serrated or non-serrated.

Santoku
Uses: slice, dice, mince.
Multiple sizes available.

Blades that further expand culinary horizons

Master Utility
Uses: slice, dice, mince.
Chef's Knife meets Utility Knife.
Blade shape first developed by Shun.
6.5" blade length.
[Available in multiple knife series]

Asian Multi-Prep
Uses: meat/protein prep, produce prep.
Traditional Japanese blade shape designed for proteins; works great on produce too.
5" blade length.
[Available in multiple knife series]

Boning/Fillet
Uses: butchery & fillet, meat/protein prep.
6" and 6.5" blade lengths available.
[Available in multiple knife series]

Asian Utility
Uses: larger produce, meat/protein prep.
Blade shape first developed by Shun.
6.5" and 7" blade lengths available.
[Available in multiple knife series]

Ultimate Utility
Uses: delicate produce prep, sandwiches.
Blade shape first developed by Shun.
6" blade length.
[Available in multiple knife series]

Nakiri
Uses: produce prep, slice, dice, mince.
Traditional Japanese blade shape.
5.5" and 6.5" blade lengths available.
[Available in multiple knife series]

Kiritsuke
Uses: slice, dice, mince.
Similar to Chef's Knife. Known as the Japanese master's knife.
8" blade length.
[Available in multiple knife series]

Yanagiba
Uses: slicing raw fish for sashimi and sushi.
Traditional Japanese blade shape. Thick single bevel blade for rigidity and precision.
8.25", 9.5" and 10.5" blade lengths available.
[Available in multiple knife series]

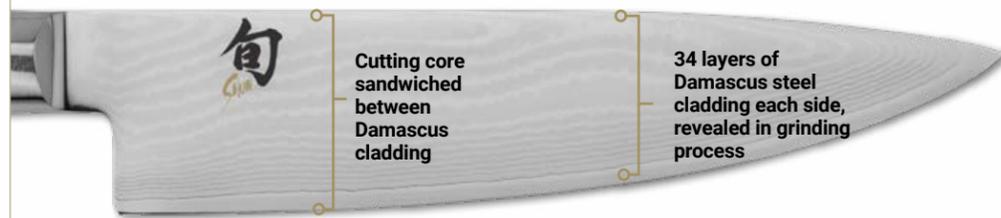

Brisket knife
Uses: trim and slice larger cuts of meat.
Long and narrow blade cuts elegant slices in a single pass.
12" blade length.
[Available in multiple knife series]

Blade Materials

What is Layered Damascus?

Shun's Damascus is formed by layering different types of metal alloys together, then forging them into a single piece. The process and the different characteristics of the layered metals create the rippling patterns you see on the blade. The number of layers can vary; many Shun knives, for example, have 34 layers of metal on each side of a high performance VG-MAX cutting core.

Damascus looks beautiful, supports and protects the hard, dense cutting core, and adds stain resistance. In Japan, this style of blademaking is known as kasumi.

Kasumi means "mist" and is so called because the exterior Damascus can have a lovely misty appearance when compared to the harder cutting core. Kasumi construction provides the ultimate mix of properties: an extremely sharp edge and ease of sharpening.

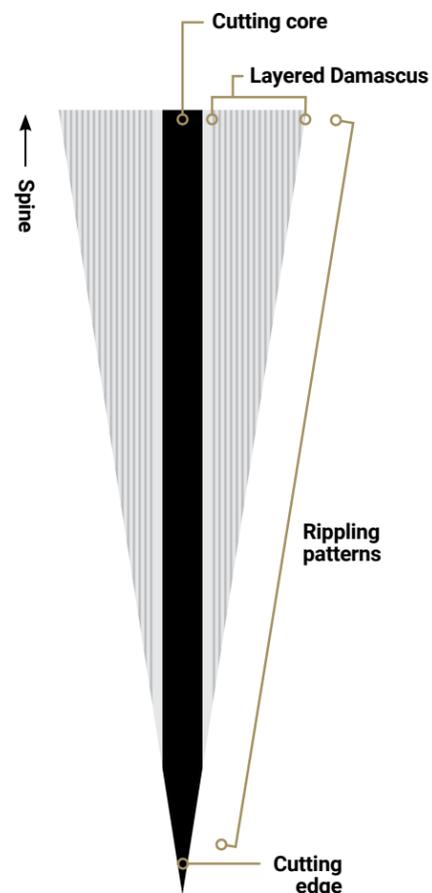

In addition, the layered Damascus process Shun uses offers you some key cutting benefits. It not only helps food release more quickly and easily from the blade, but also reduces cutting drag, making your meal preparation experience even better.

What is Dual Core Steel?

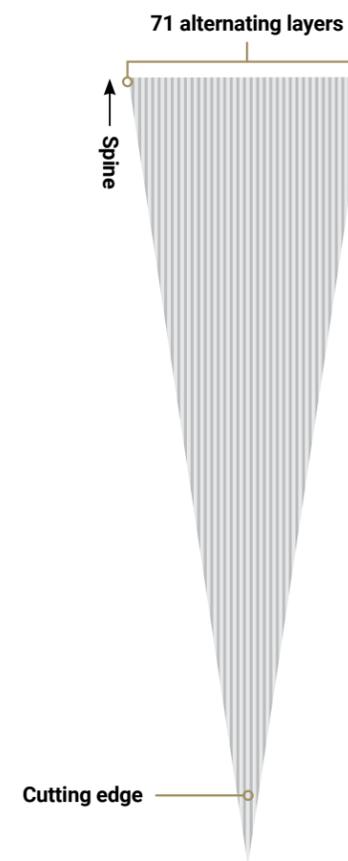

The Shun Dual Core and Hikari series feature Damascus blades made from two premium-quality, high-carbon stainless steels. 71 alternating micro layers of high carbon, high chromium VG10 and VG2 stainless steels are roll-forged to produce a finer grain in the steel and to give it both strength and beauty. The laminated steel is then hot forged to create the beautiful herringbone pattern that allows the layers to alternate along the cutting edge.

During normal use, the two steels will wear at different rates creating micro serrations along the edge. This means Dual Core's extremely sharp edge performs at a high level even longer. The etched laminations in the blade reduce drag, helping food release from the blade so it glides through each cut quickly and easily.

Shun layer counts

- Dual Core:** 71 layers of VG2 & VG10 Dual Core stainless steel
- Hikari:** 71 layers of VG2 & VG10 Dual Core stainless steel
- Fuji:** 160 layers of stainless steel + SG2 core
- Kaji:** 64 layers of stainless steel + SG2 core
- Premier, Premier Grey, and Premier Blonde:** 68 layers of stainless steel + VG-MAX core
- Classic & Classic Blonde:** 68 layers of stainless steel + VG-MAX core
- Kanso:** Solid AUS10A
- Sora:** 2 layers of stainless steel + VG10 core

Dual Core Construction

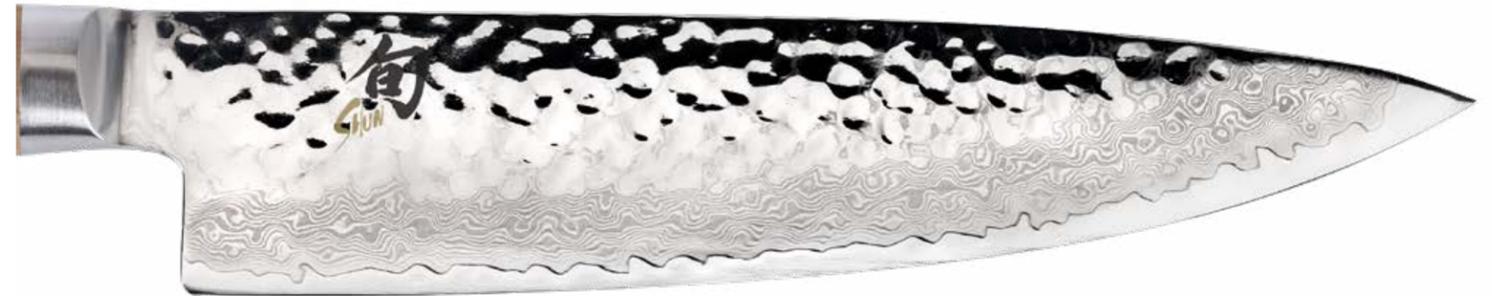

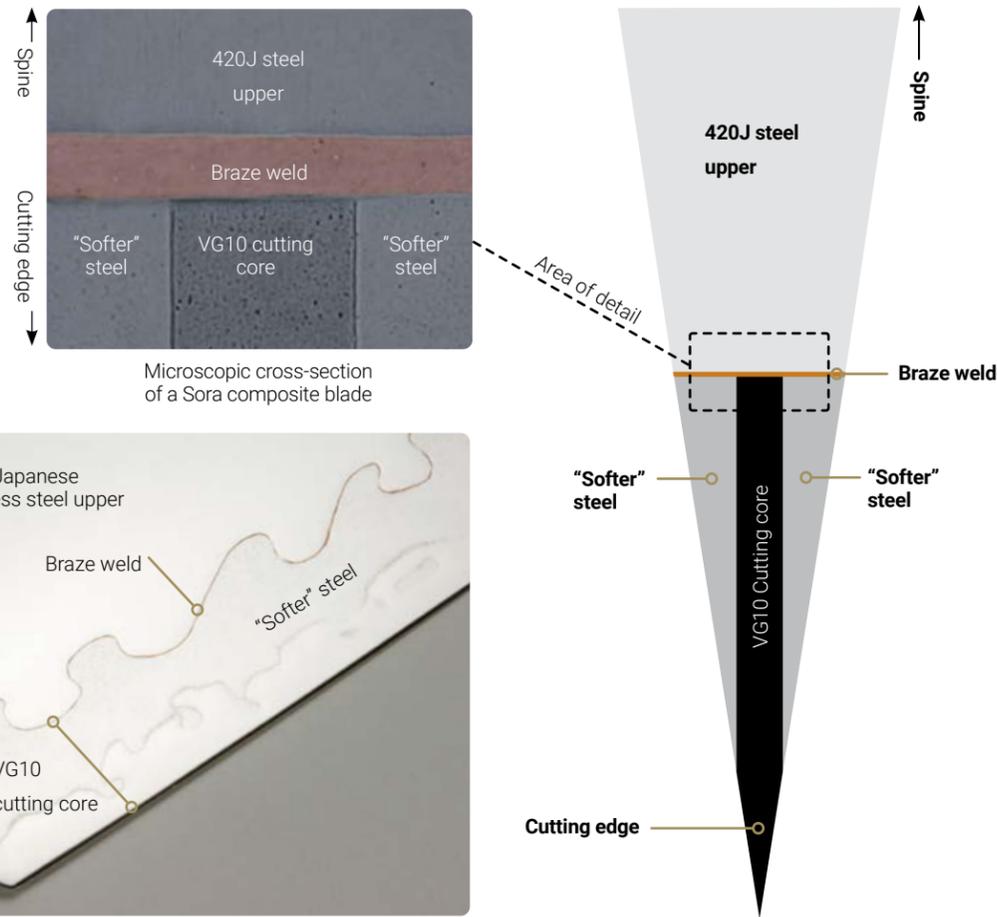

Instead of cladding surrounding a cutting core of advanced stainless steel, Dual Core is made up of 71 alternating layers of two premium stainless steels. The diagram at left shows how the Dual Core layers work.

Dual Core blades are thin, light, strong, and offer you an extremely high level of performance as well as refined beauty.

What is Composite Blade Technology?

Shun's proprietary Composite Blade Technology is a technique that enables us to put high-performance steel exactly where it's needed most—on the cutting edge of the knife. In Shun's Sora line, VG10 san mai comprises the lower part of the blade, that is, the cutting edge.

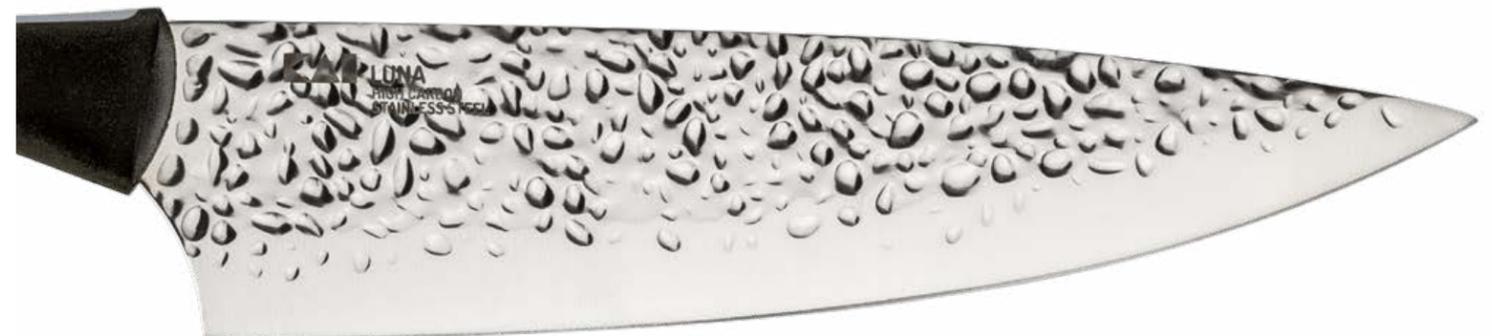

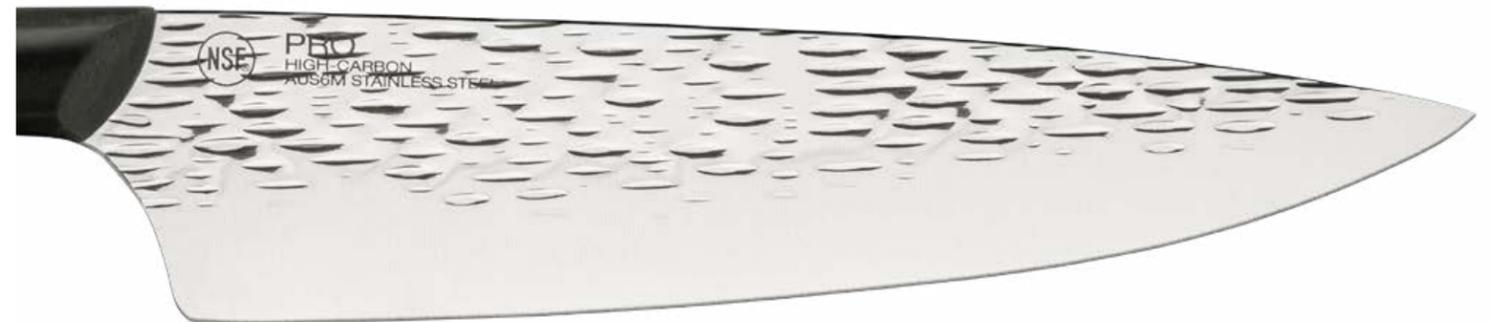

The upper part, above the copper weld line, is 420J Japanese stainless steel. The two sections of the blade are laser cut and fit together like pieces of a jigsaw puzzle. Braze welding permanently joins the pieces to create a durable blade that puts the performance of VG10 exactly where it's needed.

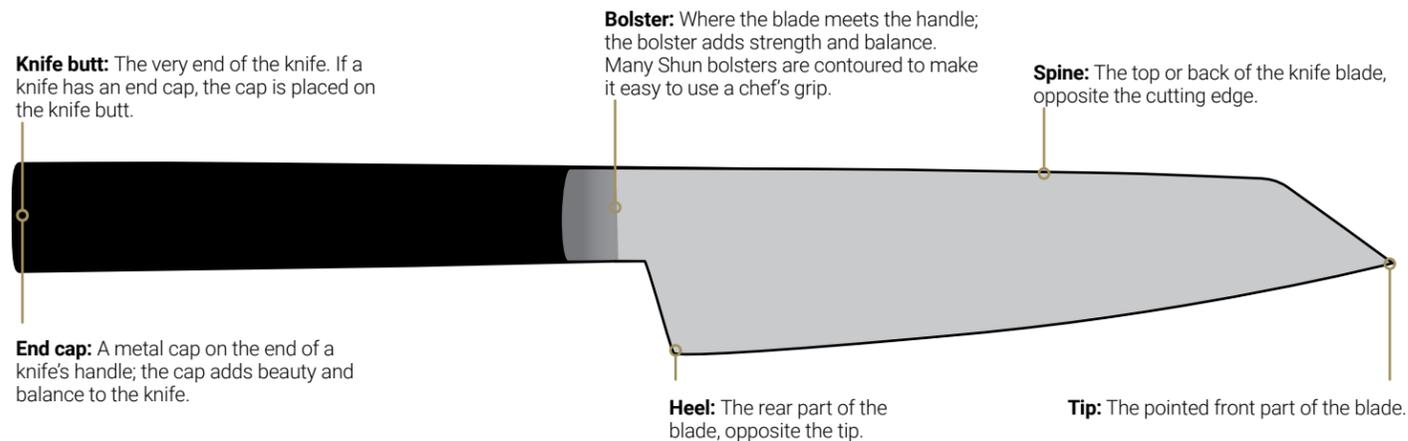

What is Tsuchime?

In Japanese, *tsuchime* (tsoo-CHEE-may) simply means "hammered" and you will see actual hammer marks on a *tsuchime*-finished blade. This finish does two things. First, it gives the knife a look that is reminiscent of the handcrafting techniques of ancient Japan. In addition, the technique creates tiny pockets of air that act as hollow-ground cavities to reduce drag and help food to release from the blade more quickly.

Shun's gorgeous Premier series (including our new Premier Blonde) features a hammered *tsuchime* blade finish as do some of our exclusive lines. The PRO series from Kai features a different style of *tsuchime* finish with more defined hammer strikes. Both styles exemplify the ancient Japanese knife-making tradition, provide food release benefits, and give the blades a striking and unique look.

Anatomy of a Knife

A legendary, bladed tradition

In Japanese culinary tradition, it is the highest-level chef who is responsible for cutting foods for the restaurant. The chef prepares each ingredient to preserve its full flavor and capture its perfect seasonality.

The right knife for the best flavor

Such precise cutting is essential to retain food's freshness and to enhance the beauty of its presentation. So, it's no wonder knives play a vital role in Japanese cuisine. But this tradition of careful preparation and seasonal eating isn't reserved just for acclaimed chefs. Home cooks celebrate it, too. In fact, this Japan-wide culinary tradition is the source of the Shun brand name.

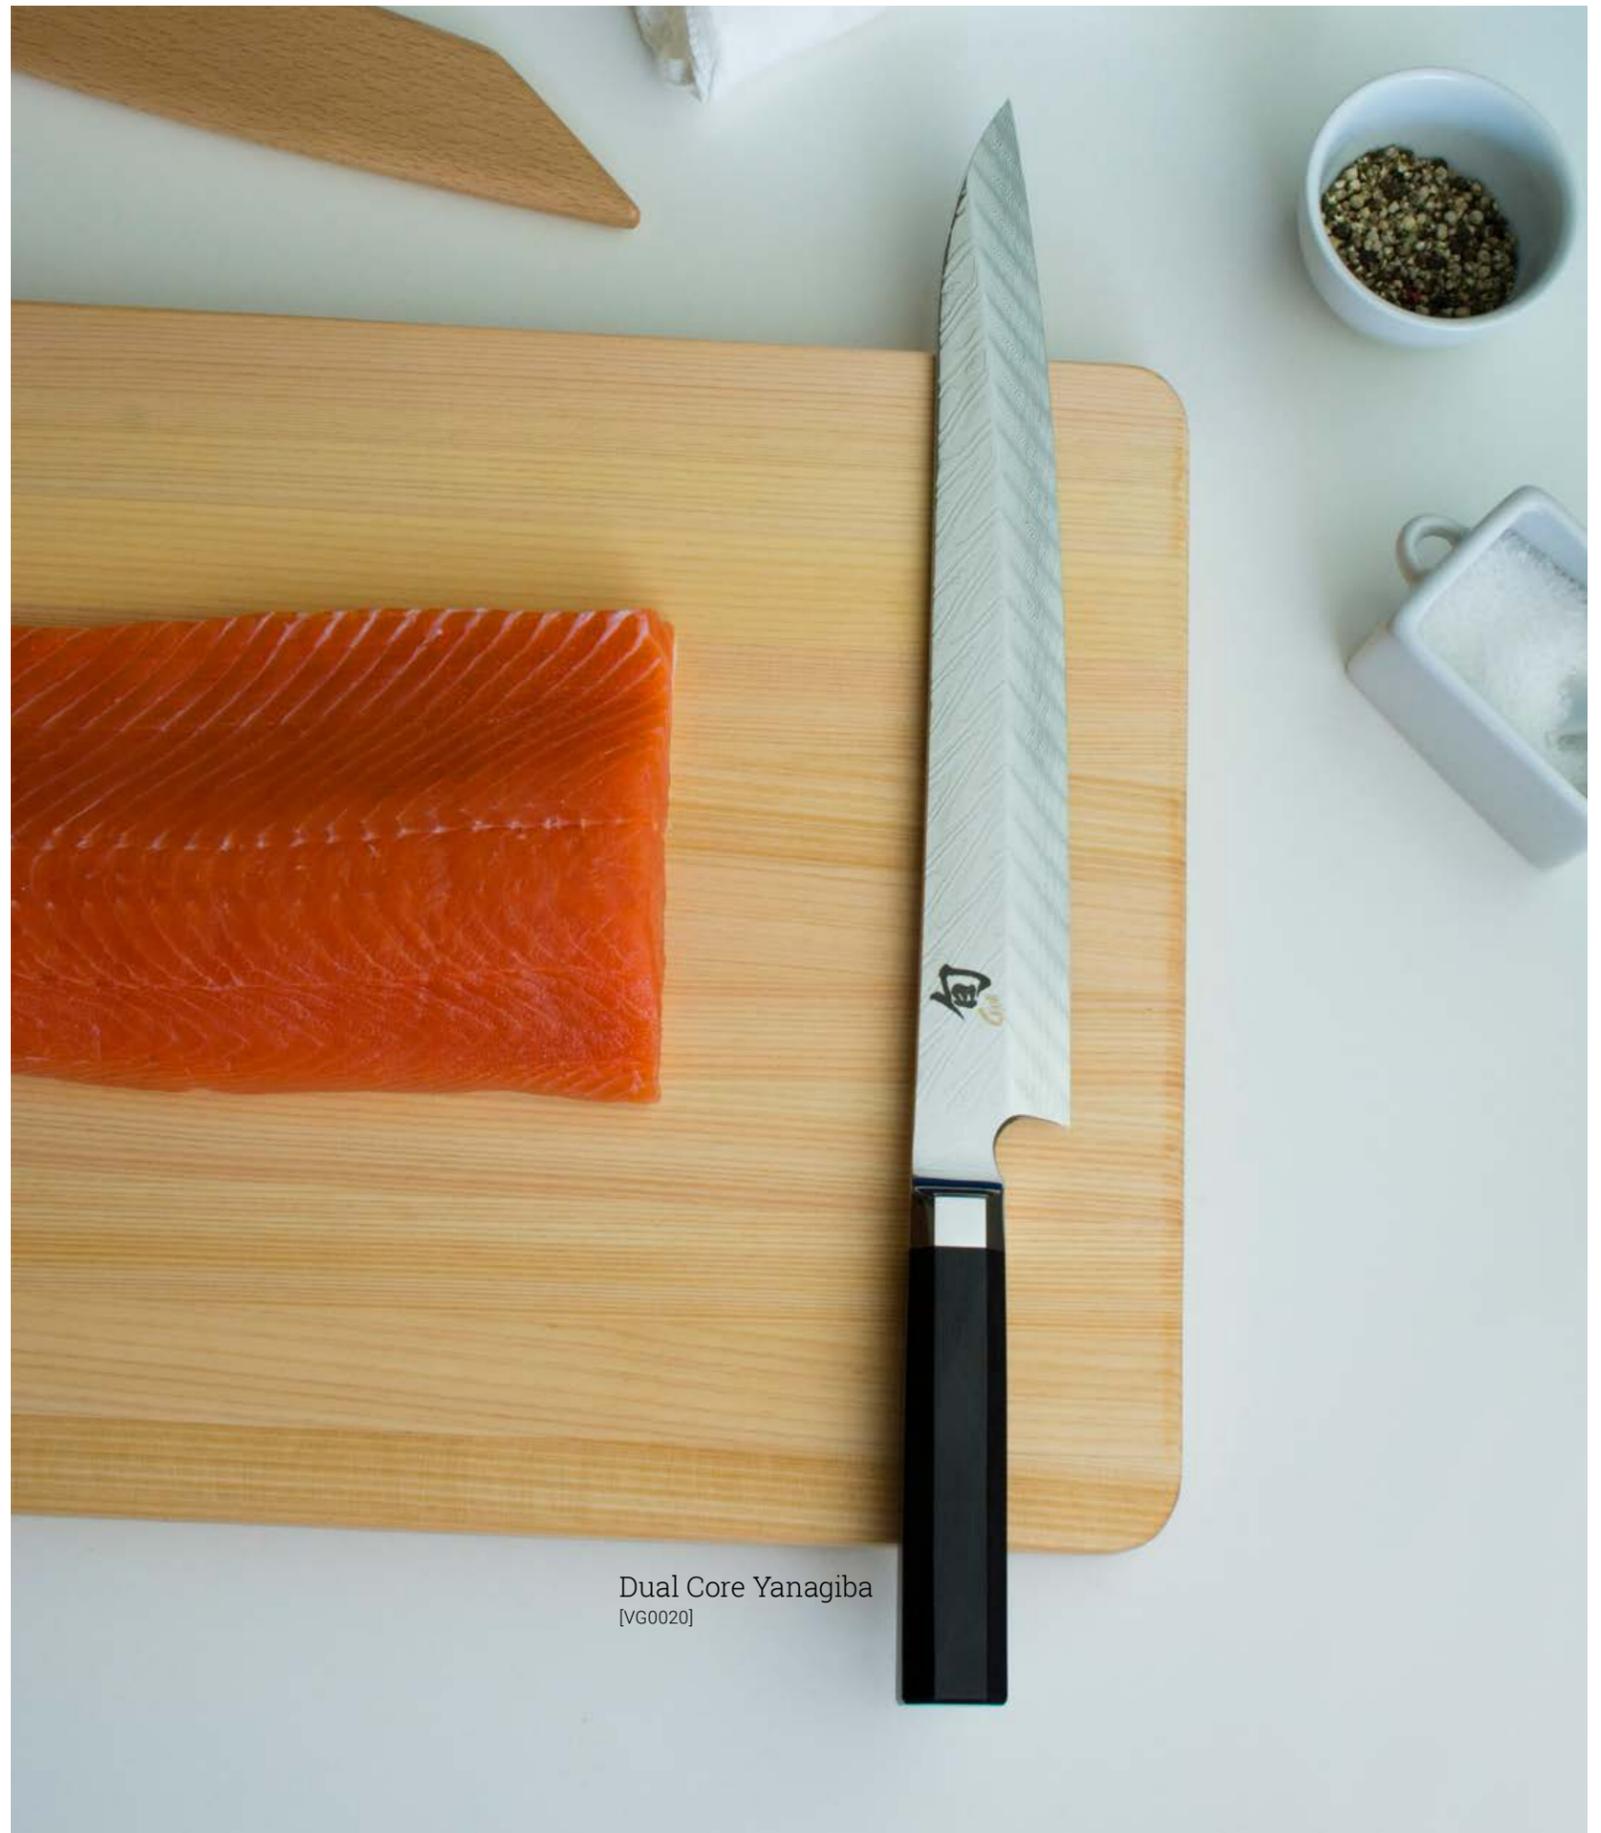

The peak of perfection

"Shun" refers to eating each food at its ideal seasonal moment—when it is at the peak of perfection. Shun is when fruit is perfectly ripe, vegetables are at their best, or meat is at its most flavorful. We chose it as our name to honor this tradition and as a mark of our dedication to handcrafting kitchen cutlery that is always at the peak of its perfection, too.

More knives, less waste

Yet there is another aspect to this way of eating: making the most of ingredients with minimum waste. In other words, sustainability. That's why there are so many Japanese blade shapes. Each one serves a distinct purpose, making cutting more efficient and reducing waste. Having the right knife enables the cook to take full advantage of the "shun" of each ingredient.

Today, as more people appreciate this way of seasonal, mindful eating, Shun's industry-leading cutting performance and full selection of cutlery help create meals with less waste, more sustainability—and that preserve each food's very best flavor.

Dual Core Yanagiba
[VG0020]

Dual Coreⁱ

Graceful beauty & ultra-premium performance, for the connoisseur

Dual Core is simply stunning. Yet it's not just the striking look of the blade; Dual Core's true beauty is in the knife's advanced cutting performance.

Superior edge retention, less frequent sharpening

With the blade's 71-layer construction and unique, herringbone blade pattern, Dual Core maintains its high level of performance longer, so you can sharpen less and create more.

Perfect weight, balance

Even with hours of food preparation ahead of you, lightweight Dual Core remains highly maneuverable and extremely comfortable to use. Step up to Dual Core and step up to extraordinary.

Exceptional cutting performance with Dual Core's thin, light 71-micro-layer blade.

Secure storage, in the included wooden saya (sheath)

Comfortable, secure grip with traditional Japanese octagon handle; rabbit tang for lightweight maneuverability.

The ultimate
sushi knife,
designed
to perfectly
portion
proteins

The Shun Dual Core Yanagiba has the length, weight, and single-bevel design of a traditional Japanese yanagiba. The blade stock is thicker than the rest of the Dual Core series (4.5mm vs 2.5mm). This gives the knife heft and rigidity to glide through cuts with ease. This single-bevel blade offers a strong, razor-sharp edge and simplified sharpening. A gentle hollow-grind on the back of the blade makes food release easier.

The spine of Shun Dual Core Yanagiba (left) and Kiritsuke (right).

Premierⁱ

Handcrafted elegance,
traditional artistry,
advanced performance

Shun Premier owners worldwide are slightly obsessed with their knives.

To understand, try Premier yourself

As you use it, the balance and weight feel good—solid without being heavy. The blade cuts, slices, and dices, with ease. No muscling through the cut. It simply glides through, bringing your own kitchen artistry to life.

Beauty with benefits

Premier's delicate cladding and hammered tsuchime blade finish are beautiful, yes, but also help food release more quickly, which is just another very good reason for allowing yourself a slight obsession with your cutlery.

Clean, easy cutting every time
with Shun's proprietary VG-MAX stainless steel
cutting core and 69-layer Damascus construction.

Food releases quickly from the blade
with the hammered tsuchime blade finish.

Secure, comfortable handle
with its symmetrical design and embossed endcap.

Classic

The knife that started a revolution in kitchen cutlery

Shun Classic was the first to bring the beauty and unmatched cutting performance of fine Japanese handcrafted cutlery to a wider North American market.

What does that mean to you?

It means a seriously sharp kitchen knife that cuts through every kitchen task with ease and grace to make meal preparation faster and easier.

Secure, comfortable grip

Classic's traditional Japanese handle has a gentle swell on one side for a secure grip as you work, so you can breeze through your prep. Try Classic and let its beauty and performance revolutionize your own cooking.

Find the right knife for every task; Classic offers the largest number of blade shapes of any Shun series.

Trusted by professionals; Shun Classic is NSF Certified for use in commercial kitchens.

Glide through every kitchen chore with Classic's VG-MAX "super steel", beautiful 69-layer Damascus construction, and D-shaped handle.

Kansoⁱ

Perfect simplicity and precision performance defines Kanso

Shun Kanso is built on the Zen principle of simplicity.

Understated elegance

You can see it in the knife's simple, graceful design. There's nothing extra, nothing overdone—yet the knife's Heritage blade finish and "iron sword wood" handles are undoubtedly eye-catching.

Simple precision in each cut

Kanso's sharp edge and perfect balance make food preparation easy. Cooking with Kanso feels simple and natural, like the knife is an extension of your arm. From its blade of ultra-premium stainless steel and ideal balance to the precision cutting control it provides, Kanso is simply perfect.

Built for lifetime performance; AUS10A high-carbon stainless blade; Heritage finish hides use scratches.

Precision balance & strength with full tang construction.

Comfortable handle of contoured tagayasan (wenge) wood; designed for left/right-handed use

Sora

Advanced
blade technology,
world-class results

Experience truly astonishing performance
when you cook with Sora.

Why?

The secret is Shun's proprietary
Composite Blade Technology. It joins
two steels in one blade, putting advanced
steel on the cutting edge—where it's
needed. The result is smooth and easy
cutting in a perfectly balanced kitchen
knife. Sora's design and performance
get rave reviews from professionals and
home cooks alike.

Unmatched aesthetics

Our Composite Blade Technology gives
Sora peerless style, too. Where the two
steels meet and are permanently joined, a
wavy line is formed. We call it a "modern
hamon." You'll just call it beautiful.

Performance & value;
Shun puts advanced VG10 stainless steel
on the cutting edge.

Used by pros;
NSF Certified for
commercial kitchen use.

Comfortable, easy-grip handle
provides strength and balance;
blade tang extends to handle emblem.

Shun EXCLUSIVES

In addition to the beautiful Shun Cutlery series you'll see in this catalog, Shun also creates these exquisite exclusives.

Shun Fuji

Inspired by Japan's majestic Mt. Fuji, Shun Fuji represents the pinnacle of precision fit and finish, perfect balance, and graceful symmetry.
Williams-Sonoma exclusive

Shun Hikari

In Japanese, Hikari means "light" or "illumination," making it perfect for this beautiful light-colored cutlery with its intricate "horner's nest" blade and birch-finished Pakkawood handles.
Williams-Sonoma exclusive

Shun Kaji

Shun Kaji is fusion of the best of Japanese and European design. Japan's thinner, harder, and sharper blades are paired with the full-tang construction of fine European knives—for the ultimate in style and function.
Williams-Sonoma exclusive

Web-only EXCLUSIVES

From exclusive cutting boards to chef's aprons and gorgeous steak knives, you'll only find these products on our websites.

Hinoki Cutting Boards with Urushi Edge

If you've seen an example of Japan's famous red-and-black lacquerware, you've seen Urushi. Urushi is a natural tree sap that is applied by hand to Shun's urushi-edge cutting boards. Why? The end grain of a wood cutting board absorbs more moisture than the rest of the board. Urushi prevents this, helping maintain your cutting board so it can continue to help maintain your knives.

Available only at shuncutlery.com

Shun Aprons

"Pho" apron (pictured) [SHUNAPRON10]

"Dashi" apron [SHUNAPRON11]

"Stingray" apron [SHUNAPRON12]

Made to Shun's exacting specifications by Hedley & Bennett, manufacturers of professional chefs' gear, these handsome aprons are clean, simple, comfortable, durable—and will keep you looking like a pro.

Choose from three colors and fabrics: "stingray," a light grey 100% cotton canvas, "pho," a dark grey stretch denim, or "dashi," a soft, Japanese denim in navy with a woven herringbone pattern.

All three aprons feature adjustable neck strap, double pen chest pockets, a right-side towel loop, and a large lap pocket.

BEAUTIFUL, USEFUL KITCHEN PRODUCTS YOU'LL USE EVERY DAY

Whether you're making a quick weeknight dinner or cooking up something fancier for food-loving friends, Kai offers the kitchen tools that can make all the difference. A knife with a razor-sharp edge, with just the right blade shape for the job—and useful tools like the perfect grater or a great pair of kitchen shears—all make your time in the kitchen easier and more satisfying.

Cutlery excellence since 1908

Kai was born in Seki City, Japan. Seki City is Japan's famous sword and knifemaking center and has a blade-making tradition that goes back over 800 years. Today, Kai is one of Japan's most well-known names, providing customers worldwide with a wide array of kitchen cutlery and other fine home products. When the company started, in 1908, its first products were pocket knives. Yet you may be more familiar with Kai today as the makers of Shun Cutlery, our handcrafted, top-of-the-line Japanese kitchen knives.

Cutlery to meet every need

For professional-level performance in your kitchen, choose PRO, our NSF Certified, commercial-grade kitchen cutlery series. PRO includes all the most-needed knives and a handsome look you'll enjoy using. The Wasabi series features both Japanese and Western blade styles with a traditional Japanese-style handle and razor-sharp edge. Luna provides amazing performance at an incredible price, while our Pure Komachi 2 knives are colorful, fun to use, and the perfect way to brighten up any kitchen.

Quality every step of the way

Each Kai product is backed by a rigorous dedication to quality assurance throughout the manufacturing process. From materials, to precision laser cutting and grinding, to sharpening and finishing, every product is strictly controlled for quality and precision.

PRO
3 piece set

Pro

Pro-level performance, striking design

Make fast work of every kitchen task with PRO's razor-sharp edge, comfortable grip, and precision handling.

Sharpen less, cook more

PRO's blade is hand sharpened and finished for an edge that lasts a long time without re-sharpening—yet re-sharpens easily when needed.

Work without a slowdown

PRO knives are nicely balanced and feel just right in your hand. Food releases more quickly from the hammered-finish blade. Meals are prepped and ready faster—and with professional precision. Built to stand up to rigorous use, PRO is NSF Certified for use in commercial kitchens.

Fast, easy food prep

High-quality Japanese AUS6M stainless steel holds its hand-sharpened/finished 16° edge longer.

Food releases easily

Hammered finish helps with food release; grazed finish adds beauty, enhances corrosion resistance.

Sturdy, comfortable handle

Contoured, riveted POM handle feels secure in the hand; full-tang construction adds strength.

The Professional Choice

NSF Certified

PRO has been certified for use in commercial kitchens by NSF International. The NSF develops health standards and certification programs that help maintain the very highest levels of food safety.

Health departments, restaurant buyers, and specifiers worldwide trust NSF Certification. They know that to receive the NSF seal, products that will be used in the handling of food must meet strict standards for safety and quality.

Quality Guaranteed

From the very beginning, both safety and quality have always been top concerns for Kai. The handsome PRO line is no exception to this legacy.

PRO quality extends far beyond these knives' substantial "look and feel." We work with independent laboratories to thoroughly evaluate our knives—ensuring that the sharpness, hardness, and even the microstructure of the steel in the blades are what they should be. Furthermore, we back this quality promise with a **Limited Lifetime Warranty** and **Free Lifetime Sharpening**.

NSF Certification and Kai's own high quality standards make PRO a top choice for anyone working in the commercial food industry—as well as for home cooks concerned with the health and safety of themselves and their families.

Wasabi

The best of east-meets-west

Experience the beauty and precision of Wasabi kitchen cutlery from Kai.

Single-bevel precision, double-bevel convenience

Enjoy the precision that a single-bevel Japanese blade can provide when preparing fish or slicing sushi. Then get the convenience and cutting ease that Wasabi's double-bevel knives have to offer in both Japanese and Western blade shapes.

Traditional handle for comfort & control

Wasabi's Japanese-style handle provides a secure grip and is extremely easy to hold. With this comfortable handle, and its streamlined look and sharp performance, it's no wonder Wasabi is one of our most popular cutlery series.

Easily match blade-style to task

Razor-sharp 16° cutting edge—single-bevel for extreme precision, double-bevel for cutting ease.

Easy-care blades

High-carbon Japanese stainless steel blades for sharp performance; grazed finish adds beauty & enhances corrosion resistance for easier maintenance.

Comfortable, secure grip

Traditional, Japanese-style handle fits securely in your hand, is easy to clean.

Luna

The perfect combination of style and value

Luna is striking kitchen cutlery

You'll see and feel the quality immediately. Luna's blade, made of high-quality German stainless steel, is sturdy, rigid, and very sharp for fast, easy, and consistent cutting.

Thoughtful touches add safety and convenience

Luna's handle is contoured to fit your hand with soft-grip inserts at top and bottom. These rubberized inserts provide a secure hold even when your hands are wet or damp.

Each knife is hand sharpened and finished for a high-quality long-lasting edge. For safe in-drawer storage, Luna also includes a durable molded sheath to fit each knife.

Fast, easy food prep

Luna's high-quality, German stainless steel blade is hand sharpened and finished to a razor-sharp 16° edge for fast, easy cutting.

Food releases quickly

Hammered blade finish creates air pockets so food releases more quickly; grazed finish adds beauty, enhances corrosion resistance.

Less tiring to use

The knife's lighter weight and comfortable, soft-grip handle lessen hand fatigue.

7 Pure Komachi 2

Brilliant color is just the beginning

The first thing you notice about Pure Komachi 2 is the color. A block full of these colorful knives on your countertop is an easy, fun way to brighten up any kitchen.

A sharp knife means easy meal prep

Pure Komachi 2 blades are lightweight, thin, and hand-sharpened to a razor edge—so they quickly cut through fruits and vegetables and portion proteins with ease. The eye-catching color coating is food safe and scratch resistant.

Secure grip, easy storage

Contoured handles provide a secure grip. And each knife includes a color-matched sheath for safe storage, too.

Food prep is more fun

Quality stainless steel and a sharp 16° edge make meal preparation faster and easier; the bright colors make it more fun.

Easy care, food-safe coating

Colorful coating is food safe, helps food release from blade, and resists corrosion.

Less tiring to use

Lightweight knives and contoured handle provide a comfortable grip with less hand fatigue.

4 Pc Serrated Steak Knife Set
[AB7075]

Kai Personal Steak Knives
The fine, razor-sharp edge of the Personal Steak Knife cuts cleanly, keeping more of the flavorful juices inside your steak. The design is inspired by the original Japanese folding knife.

The razor-sharp edge is sharpened to a 16° cutting angle on each side. The Japanese 420J2 stainless steel blade opens easily with a slim, stylish lever, then a liner lock holds the blade safely open during use.

It folds for easy storage in the included leather sheath.

Hinoki Cutting Boards

Hinoki wood is renowned for its beauty and delicate fragrance. Used in a cutting board, this medium-soft wood “gives” as you cut, helping to preserve the sharp edges of your fine Shun cutlery. Quite simply, hinoki is the perfect cutting surface for all your finest knives.

The wood for Shun’s hinoki products is grown in Japan and is Forest Stewardship Council (FSC) Certified for sustainable forest management practices. In addition, all of our hinoki products are made from wood resulting from forest thinning, which is required to maintain healthy growth.

Shun Large Universal Saya

[BG0806]
Fits a variety of 7"- 8" blades.
See website for a complete list
of compatible knives.

Kai Blade Guards

Translucent blade guards let you see the knife inside for easy identification. Adjustable clips fits wide variety of shapes and sizes of knives. Eight sizes available. Protect your knives the easy way.

Always sheath your knives before placing in roll

Shun Chef's 20-slot Knife Case (Grey)

[DM0886]
Unfolded 20" x 20",
Folded 10" x 20" x 3.75"
(Knives not included)
Available only at
shuncutlery.com

Shun Chef's 20-slot Knife Case (Black)

[DM0882]
Unfolded 20" x 20",
Folded 10" x 20" x 3.75"
(Knives not included)

Kai 20-slot knife roll

[KA0882]
Unfolded 20" x 20"
Folded 10" x 20" x 3.75"
(Knives not included)

Adjustable clip
for multiple knife
shapes and sizes

[KBG1000]
4.75" x 1.25"

[KBG1100]
6.75" x 1.25"

[KBG3000]
6.75" x 2"

[KBG3100]
8.75" x 2"

[KBG3200]
10.75" x 2"

[KBG2000]
7.75" x 1.5"

[KBG2100]
9.75" x 1.5"

[KBG2200]
12.75" x 1.5"

Blocks & storage

6-Slot Bamboo Slimline Block
(with Shun logo)
[DM0845]
Dimensions: 3"W x 8"H x 9.5"D

6-Slot Bamboo Slimline Block
[DM0847]
Dimensions: 3"W x 8"H x 9.5"D

6-Slot Bamboo Slimline Block
(Dark, with Shun logo)
[DM0846]
Dimensions: 3"W x 8"H x 9.5"D

22-Slot Bamboo Block
[DM0832]
Dimensions: 6.25"W x 9"H x 12.5"D

22-Slot Block (Dark)
[DM0854]
Dimensions: 6.25"W x 9.25"H x 12.75"D

6-Slot Bamboo Sidecar
Steak Knife Block
[DM0842]
Dimensions: 2"W x 7.75"H x 7"D

8-Slot Angled Block
[DM0839]
Dimensions: 3"W x 9.75"H x 12"D

8-Slot Kickstand Block
[DM0838]
Dimensions: 3.5"W x 11"H x 16"D

11-Slot Bamboo Block
[DM0831]
Dimensions: 5"W x 9.25"H x 12.75"D

In-Drawer Knife Trays
If your kitchen countertop is short on space, or you simply prefer to keep your knives conveniently in a drawer, the Shun In-Drawer Knife Trays are the perfect answer.

7-Slot
In-Drawer
Knife Tray **New**
[DM0857]
Dimensions: 4.75" x 17.5" x 2.5"
Accommodates up to 7 knives.
See website for slot dimensions.

[DM0857] 

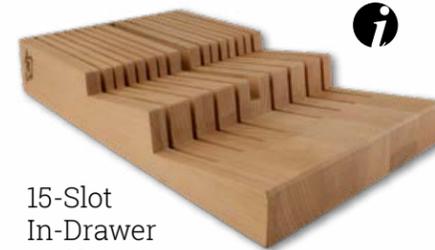

13-Slot Bamboo Block
[DM0830]
Dimensions: 4.75"W x 9.5"H x 13.75"D

17-Slot Angled Block (Beech)
[DM0850]
Dimensions: 5.75"W x 10.75"H x 13.75"D

17-Slot Angled Block (Dark)
[DM0848]
Dimensions: 5.75"W x 10.75"H x 13.75"D

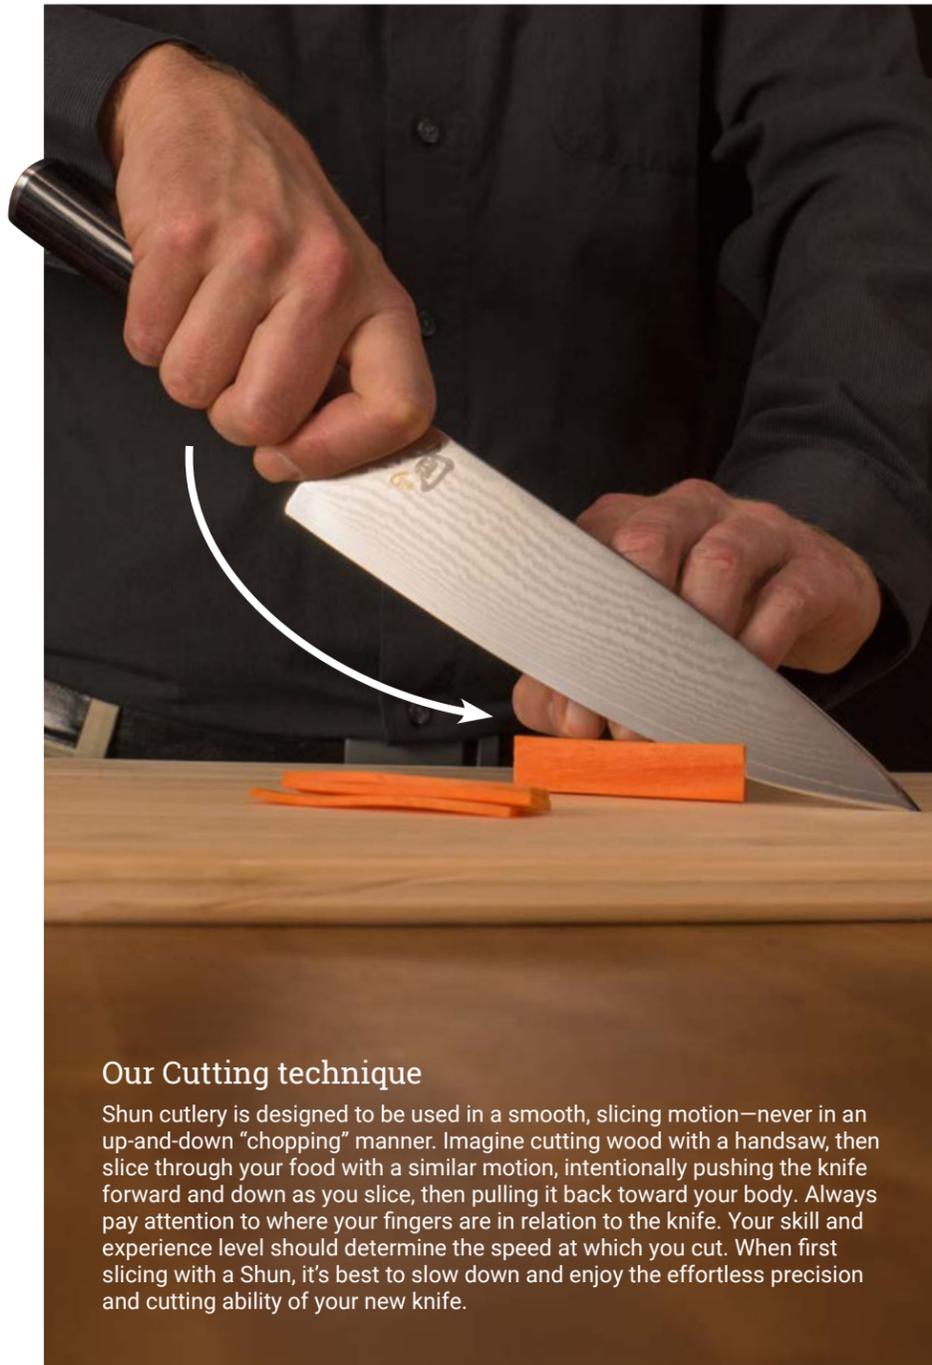

15-Slot
In-Drawer
Knife Tray
[DM0856]
Dimensions: 10" x 17.5" x 2.5"
Accommodates up to 14 knives plus 1 slot for your
Shun Honing Steel. See website for slot dimensions.

[DM0856] 

If this is your first Japanese knife, congratulations! To keep your fine Shun cutlery performing at the highest level and to maintain its striking beauty, follow these tips for how to best use and care for your knife.

Our Cutting technique

Shun cutlery is designed to be used in a smooth, slicing motion—never in an up-and-down “chopping” manner. Imagine cutting wood with a handsaw, then slice through your food with a similar motion, intentionally pushing the knife forward and down as you slice, then pulling it back toward your body. Always pay attention to where your fingers are in relation to the knife. Your skill and experience level should determine the speed at which you cut. When first slicing with a Shun, it’s best to slow down and enjoy the effortless precision and cutting ability of your new knife.

Cutting surface

The cutting surface you use makes a big difference in keeping your knives sharp. A good cutting board will help retain a sharp edge for substantially longer. Soft woods, such as hinoki, are preferred. Tile, ceramic, synthetic, marble, granite, or any kind of glass cutting boards are not recommended and can be harmful to your knives.

Handling tougher foods

For heavy-duty kitchen work, such as breaking down poultry or preparing hard vegetables (like butternut squash), choose the appropriate knife. For heavier work with bone-in meat, try the DM0767 Shun Classic Meat Cleaver or HT7067 PRO Cleaver. Tackle that tough butternut squash with the DM0766 Shun Classic 8” Western Chef’s Knife. It has a wider cutting angle that helps when cutting hard foods like that. Being able to choose the exact knife you need for any job is just one more reason to have a selection of kitchen knives readily at hand.

Washing & drying

1. Handwash with gentle dish soap. Don't use soaps with citrus extracts or bleach; they can promote corrosion.
2. Do not use scouring pads, steel, or gritty cleanser when cleaning the blades.
3. Rinse and towel dry immediately. Let knives air dry before returning to storage.
4. Never leave knives sitting in a sink full of soapy water. This promotes corrosion.
5. Store knives in a block, knife case, in-drawer tray, or sheath. Never store knives unsheathed in a drawer; this is extremely dangerous to you and damaging to the knives.

Tip: Handwashing is also the best way to care for the wood handles of Shun knives. Although the wood is stabilized, it is natural wood and, like all wood, will shrink in arid environments and swell in humid ones. The handle color may change slightly over time due to oils in the hand and the natural color-change that occurs in wood due to oxidation and/or exposure to light. This is not a defect.

Storage

It is best to store your Shun cutlery and knives from Kai in a wooden block, in-drawer knife tray, sheath, or knife case. Do not store your knives unsheathed in a drawer.

Caring for your natural wood accessories

Knife block care

- Keep clean by wiping with a damp cloth
- After cleaning, dry block immediately; never soak
- Apply mineral oil sparingly anytime the block surface appears dry or shows scratches

Cutting board care

- Wet cutting board before each use to help it resist staining
- Wash with mild detergent; towel dry, then let air-dry away from direct sunlight
- Do not put in dishwasher

Honing & Sharpening

To keep your knives in great shape, hone regularly, and sharpen occasionally. Why? Honing doesn't remove metal from the blade, sharpening does. Sharpen only when you need it.

Why does my knife feel dull?

Every time your knife contacts the cutting board, there's an impact on the blade. That's not a flaw; it's just part of using a knife. Over time and many impacts, the thin edge of the blade will naturally curl over. This is called a "rolled edge." The edge is still sharp, but because the edge is curled, the sharpest part is no longer what is moving directly through the food as you cut.

Enter the honing steel

A honing steel enables you to re-align—or uncurl—the edge so that the razor-sharp edge is once again gliding through the food as you cut. To hone, align the flat side of the blade with the 16° angle guide on the hand guard of your Shun honing steel. Maintaining that angle, gently pull the blade down the steel from heel of blade to tip. Some cooks hone once a week, some hone every day. It just depends on how much you use your knives. Either way, you will be amazed at the difference it makes when you cut. Check our YouTube channel (Shun Cutlery) for more on how to hone.

Honing has its limitations

When your knife's edge is severely rolled, and honing is no longer effective in bringing the "sharp" back, then it's time for real sharpening. Whenever you sharpen your knife, a bit of the metal is removed. But that's no cause for concern. Your knife can be sharpened again and again to return it to razor-sharp performance.

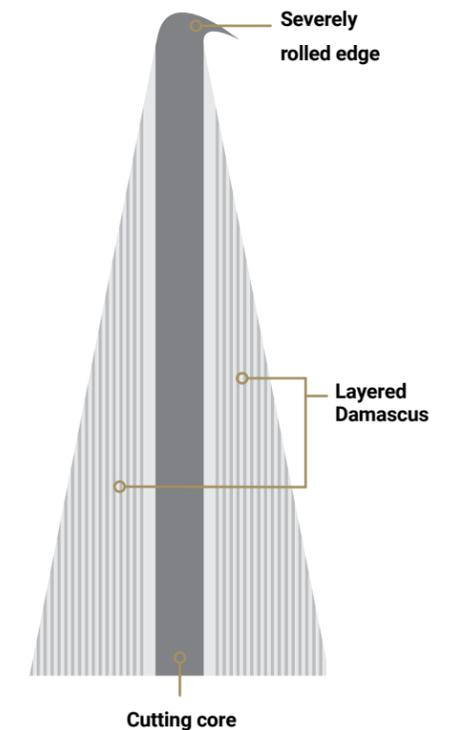

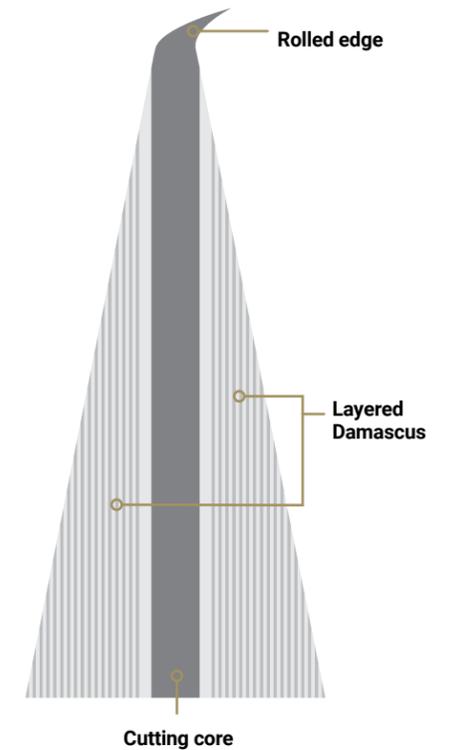

Best for sharpening? The whetstone

When sharpening on a whetstone, it's important to make sure the knife is sharpened at the correct 16° angle and to maintain a consistent angle along the entire cutting edge as you sharpen. But remember, only sharpen when you really need it. Once a year is probably more than enough for most home cooks. Professionals, of course, will need to sharpen more often. If you prefer hands-on sharpening, we recommend learning how to use a whetstone. The Shun 3-Piece Sharpening Set includes a base that helps you maintain the correct angle more easily. Seasoned sharpeners will like our new lineup of four whetstones and leveling stone.

Prefer not to sharpen yourself?

No problem. In fact, the easiest way to ensure your knives are sharpened correctly is to send them to us. We offer FREE sharpening for the lifetime of your Shun and knives from Kai Housewares.

Here to help ⁱ

If you purchased your Shun or Kai Housewares knives in the USA, Canada, or Mexico, you can send them to us at Kai USA in Oregon for free sharpening. (See our website for the required forms and details.) If you purchased your Shun or Kai Housewares knives outside of the USA, Canada, or Mexico, please return them for service to the authorized dealer from whom you originally purchased them.

Free sharpening service

Your Shun and Kai Housewares cutlery performs best when the edge is sharpened to our 16° angle on each side. If you prefer not to sharpen them yourself, we'd be happy to sharpen any Shun or Kai Housewares knife for free for the lifetime of the owner. You pay for shipping and processing and our expert sharpening services are FREE.

Hiromai sharpening

When we sharpen your knives in our Tualatin, Oregon facility we use the same type of horizontal sharpening wheel used to put the original edge on your knives. Called a hiromai, this sharpening wheel—and the skill of our knife care experts—ensures a sharp edge every time.

Warranty

All Kai products are backed by solid warranties against manufacturing defects, so you can always feel secure in your purchase. Please check our website to see which warranty applies to specific products. If you have any questions about your purchase and which warranties may apply, please contact our expert Warranty Team. They'll be happy to assist you.

Want to get your hands on a Shun or Kai Housewares knife?

Visit one of our Authorized Dealers

Check our online Dealer Locator to find the Shun or Kai Housewares dealer in your area. (You can also find Authorized Online Dealers.) Visit any of these dealers to see how the knife feels in your hand and discover which suits you best. When you buy from our Authorized Dealers, you can be sure you're getting the genuine article, fully backed by our warranties. These dealers are specially selected for their ability to professionally represent and sell our fine kitchen cutlery and accessories. We are proud to do business with them and you will be, too.

Learn more

Independent third-party testing facility inspecting the structure of core steel

Want to know more? Visit our websites to learn more about the materials we use. Find out how to get the most from your knives. Discover additional information about our company and brands, and more.

Quality materials

While many steels may look alike on the outside, inside they're not the same. The formula—the recipe—for any specific steel can make a difference in how it handles in cutlery. Kai uses advanced and high-quality steels to make our products. And we rigorously test to ensure that the steel formula is precisely what it should be for top performance every time. Learn more about each of our steels as well as our handle materials on our websites.

Manufacturing precision

Our manufacturing processes are just as meticulous as our attention to quality materials. Each Shun knife requires at least 100 handcrafted steps to complete and is inspected at every step along the way to ensure the highest quality. Products from Kai Housewares use precision manufacturing technology and continual quality inspection to make certain our products maintain the highest standards.

In addition, all knives from Kai Housewares are hand sharpened and finished for a sharp, long-lasting edge.

Tight quality control

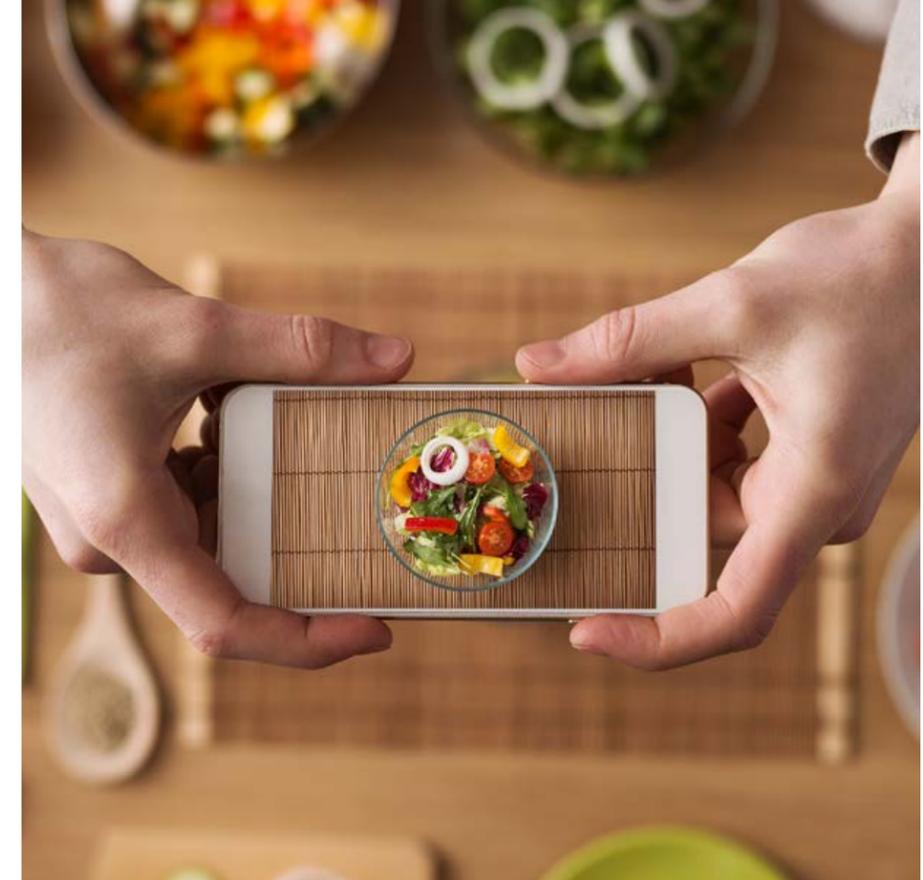

Our products are inspected throughout the manufacturing process, and they are inspected and tested again when they arrive at Kai USA in Portland, Oregon. In addition, we send out products for independent third-party testing to guarantee our products continue to meet our demanding specifications.

Use & care of your knives

Visit our websites to find out how to get the most from your cutlery with smart (and easy) use and care tips. Learn the important difference between honing vs sharpening, the correct terms for the various parts of a kitchen knife, how cutting technique affects your knives, and much more.

Blade Steel

High-performance materials

Steel is an alloy of iron and carbon; the atoms of one element occupy the spaces between the atoms of the other so that the materials are inextricably joined. Most steel also has ingredients to enhance specific characteristics. For example, stainless steels contain chromium to enhance stain resistance.

Dual Core

71 alternating micro-layers of high-carbon, high-chromium VG10 & VG2 stainless steel extend all the way to the edge. Dual Core steel is used in Shun's Dual Core, and Hikari series. These two steels are layered, welded, and roll-forged together. VG2 is a fine grained, high-carbon, high-chromium Japanese stainless steel that takes and holds a very sharp edge.

SG2 STEEL

An advanced, high-chromium powdered steel alloy. SG2 steel is used in Shun's Fuji and Kaji series. The powdered steel manufacturing method enables steel grain structure to be very fine and dense.

VG-MAX

The newest in the line of VG super steels and is proprietary to Shun. VG-MAX™ steel is used in Shun's Premier, Premier Grey, Premier Blonde, Classic, and Classic Blonde series. This steel builds on the highly successful VG10 formula by increasing ingredients that take this advanced steel to the "MAX." VG-MAX includes more carbon to improve strength and durability. It has additional chromium for wear and corrosion resistance. Increased tungsten enables the steel to be very fine-grained so the edge can be extremely sharp. Molybdenum improves corrosion resistance and strength. Vanadium improves impact resistance and enables the steel to form vanadium carbides, which enhance cutting performance.

VG10

A complicated blend. In addition to iron and carbon, it contains chromium, manganese, molybdenum, silicon, and vanadium. Most of these elements improve desirable blade characteristics such as wear resistance, corrosion resistance, hardness, and toughness. Vanadium helps make sure the steel's texture is fine, which is important for Shun's extremely sharp, long-lasting edge. VG10 is used in Shun's Sora series.

AUS10A

A Japanese high-carbon stainless steel with high strength, as well as good corrosion resistance, hardness, and wear resistance. AUS10A steel is used in Shun's Kanso series. Added vanadium refines the grain of the steel so that it takes a fine edge.

AUS6M

A Japanese high-quality, high-carbon stainless steel. It provides good wear resistance, corrosion resistance, toughness, and the ability to take a razor-sharp edge. It also resharpenes easily when needed.

DIN1.411

A German-made high-carbon, high-chromium stainless steel. It provides good corrosion and wear resistance and offers easy resharpening when needed.

Daido 1K6

A Japanese high-chromium stainless steel. It provides good wear resistance, corrosion resistance, toughness, and the ability to take a razor-sharp edge. Kai's heat treatment brings out the best qualities in this steel.

3Cr13MoV

This steel is found in Pure Komachi 2 knives. The stainless steel blades are coated with a food-grade coating to produce the eye-catching colors of Pure Komachi 2 cutlery. Kai meticulously heat treats the steel so that it offers excellent corrosion and wear resistance.

Handle Materials

Our knife handles employ a variety of materials and designs, both traditional and contemporary, to ensure each knife offers comfort and secure grip during use.

The many colors of Pakkawood

Because of the way this premium handle material is made, it can be left in its natural color (Blonde) or dyed in a variety of rich colors.

Ebony

Classic,
Dual Core,
Kaji

Blonde

Classic Blonde,
Hikari, Premier
Blonde

Walnut
Premier

Premier

Grey

Premier Grey

Pakkawood

Most Shun handles are Pakkawood, a premium handle material made of genuine hardwood impregnated with resin. The resin makes it moisture resistant, strong, and durable—important for kitchen knives. Sanding and buffing brings Pakkawood to a beautiful gloss finish. As with natural wood, no two pieces of Pakkawood are exactly alike. Pakkawood handles are used in Shun's Dual Core, Hikari, Kaji, Premier, Premier Grey, Premier Blonde, Classic, and Classic Blonde series.

Tagayasan

In Japan, this unusual dark-grained wood is known as "iron sword wood" for its incredible durability. The wood's hardness requires extra handcrafting during manufacturing, but will provide its owner with a lifetime of service. Tagayasan (or wenge) wood handles are used in Shun's Fuji, and Kanso series.

TPE

TPE is a thermoplastic elastomer that is molded to provide absolute precision in handle geometry. Shun textures the material for an easy and secure grip, even in wet conditions. TPE handles are used in Shun's Sora series.

POM

Polyoxymethylene (POM) is a thermoplastic known for its high strength, stiffness, and hardness. They are excellent for applications that require tight tolerances, such as the NSF-Certified Kai PRO series.

Polypropylene

Polypropylene is a thermoplastic polymer that is rugged, resistant to organic solvents, and has excellent molding capabilities. It is economical, durable, and recyclable.

Polypropylene with soft-grip

Handles made with this material offers all the advantages of polypropylene, but also have a "rubberized" insert that provides a softer grip and additional grip security in wet conditions.

Acrylic

Acrylic is a thermoplastic that can be mixed with various coloring agents to produce knife handle scales that are both beautiful and durable.

Series comparison

BLADE FEATURES		DUAL CORE	PREMIER (INCLUDES BLONDE & GREY)	CLASSIC (INCLUDES BLONDE)	KANSO	SORA	PRO	WASABI	LUNA	PURE KOMACHI 2
Dual Core VG2/VG10	Made of two premium high-carbon stainless steels in alternating micro layers; produces a finer grain in the steel for strength and beauty.	◆								
VG-MAX™ cutting core	Shun's proprietary VG-MAX is the latest in the VG line of "super steels," wear and corrosion resistant, holds a fine, sharp edge.		◆	◆						
VG10 "super steel"	This high-performance high-carbon stainless steel is tough, stain resistant, and takes/holds a fine edge.					◆				
Solid AUS10A	A high-carbon stainless steel with high strength, as well as good corrosion resistance, hardness, and wear resistance. Added vanadium refines the grain of the steel so that it takes a fine edge.				◆					
AUS6M	A high-carbon stainless steel that provides good wear resistance, corrosion resistance, toughness, and the ability to take a razor-sharp edge. It also resharpenes easily when needed.						◆			
DIN1.4116	A German-made high-carbon, high-chromium stainless steel. It provides good corrosion and wear resistance, and resharpenes easily when needed.								◆	
1K6	A high-chromium stainless steel that provides good wear resistance, corrosion resistance, toughness, and the ability to take a razor-sharp edge. Kai's heat treatment brings out the best qualities in this steel.							◆		
Coated Carbon	Stainless steel with a food-grade color coating. Kai meticulously heat treats the steel so that it offers excellent corrosion and wear resistance.									◆
Composite Blade Technology	Proprietary Shun technology that joins two steels in one blade and enables Shun to put high-performance steel where it belongs—on the cutting edge.					◆				
Stainless steel layered Damascus	Supports the cutting core; offers enhanced stain resistance.	◆ 71 layers total	◆ 68 layers plus core	◆ 68 layers plus core						
San mai stainless steel Damascus cladding	3-layer construction; single outer layer on each side protects and supports cutting core.					◆ 2 layers plus core				
Tsuchime ("hammered")	Hammering creates tiny pockets of air that act as hollow-ground cavities to reduce drag and quickly release food from the blade.		◆				◆		◆	
Double bevel; 16° cutting angle each side	Edge is sharpened on both sides of the blade, provides control and ease of cutting.	◆	◆	◆	◆	◆	◆	◆	◆	◆
Single bevel; 16° cutting angle one side	The traditional Japanese single-bevel blade offers an exceptionally strong, sharp edge that is easy to resharpen.	◆ Yanagiba only					◆ Yanagiba only	◆ Yanagiba and Deba only		
Full(F)/Composite(C) tang	Enables the knife handle to attach to the blade, provides strength and balance.		◆ (C)	◆ (C)	◆ (F)		◆ (F)			
Rabbit tang	The tang extends into the handle, but not all the way to the end; this is the way samurai swords were commonly made.	◆				◆		◆	◆	◆
HANDLE MATERIAL										
Pakkawood	Premium, resin-impregnated hardwood resists moisture, is strong and durable.	◆	◆	◆						
Tagayasan (or wenge)	Known as "iron sword wood," tagayasan is notable for its denseness, durability, and simple beauty.				◆					
Textured PP/TPE	Provides excellent grip, balance, and easy maintenance.					◆		◆		◆
POM	Polyoxymethylene (POM) is a thermoplastic known for its high strength, stiffness, and hardness.						◆			
Soft-Grip	Offers all the advantages of polypropylene (PP), but also have a "rubberized" insert that provides a softer grip and additional grip security in wet conditions.								◆	
HANDLE GRIP										
Symmetrical (ambidextrous)	Handle is shaped the same on both sides enabling left- or right-handed use.	◆	◆		◆	◆	◆	◆	◆	◆
Asymmetrical	Traditional Japanese D-shaped handle nestles into the curve of the right hand; yet some left-handed users prefer it.			◆				◆
